

Fintech Review Analytics: Final Report

10 Academy Week 2 Challenge | Omega Consultancy

Customer Experience Analytics for Ethiopian Fintech Apps

This report synthesizes user sentiment and thematic feedback from 1,500 reviews across CBE, Bank of Abyssinia, and Dashen Bank.

Fintech Review Analytics: Final Report

10 Academy Week 2 Challenge | Omega Consultancy

1. Executive Summary

Our data pipeline analyzed 1,500 reviews using the DistilBERT NLP model. Key findings show that while CBE has a strong volume of users, Transaction Performance remains a critical pain point. Dashen Bank leads in user satisfaction with its SuperApp UI, while BOA faces significant challenges regarding account access for diaspora users.
